

SUN 62 TECHNICAL ARCHITECTURE AND PLANNING

You will need:

1 SunSystems Standalone Server (Application/Web/Report/Database)

Following this approach, you can use the server as your remote client or you can also have different clients in the same network and in the same domain.

Hardware and Software Requirements:

<i>Processor:</i>	Dual Core 3 GHZ or Similar
<i>Operating System:</i>	Microsoft Windows Server 2012 R2 or Microsoft Windows Server 2016 <i>*Latest updates must be applied before starting the SunSystems installation process</i>
<i>Memory:</i>	Minimum 6 GB, Recommended 16 GB or more
<i>Hard Drive:</i>	We recommend two drives 512 GB each running at 7.2 k RPM <ul style="list-style-type: none">• 1 for MDF file from the database• 1 for O/S and LOG files
<i>SQL:</i>	Microsoft SQL Server 2012 SP2 or Microsoft SQL Server 2014 or Microsoft SQL Server 2016
<i>Antivirus Software:</i>	ESET (must be installed after SunSystems) <i>Never: Kaspersky, AVG, Panda</i>
<i>Firewalls/Security Features:</i>	Windows Firewall should be disabled
<i>UPS:</i>	Required with at least 20 minutes of backup
<i>Office Version:</i>	2010 to 2016/365 32 Bit (x86) <i>Never 64 Bit (x64)</i>

Client Machines:

For client installation, you want to have computers with 8GB RAM or more on Windows 8 or above.
